Project Experience

Dragon Stone War - Tencent Game

- Description:
 - American cartoon-style SLG mobile game
- Responsibilities:
 - PCG solution design and development for SLG. Map generation feature development, vegetation, river, and mountain generation logic, test case setup

Project 1UP - Tencent Game

- Description:

- Stylized rendering FPS PC game
- Responsibilities:
 - Urban PCG feature development. Secondary development based on Matrix, automated configuration generation
 - Tool development and optimization, custom Houdini Engine for UE, collision tool optimization

Project TZ - Tencent Game

- Description:
 - Chinese-style cultivation RPG multi-platform game
- Responsibilities:
 - Tool development. Volumetric cloud generation tool, pre-computed cloud lighting tool, automated tree tool (pivot, SDF-AO, normals), resource inspection tool design and data visualization development coordination
 - Rendering optimization. Billboard cloud asset creation and rendering adjustment, particle cloud asset standard production and material development, galaxy, grass wind field optimization
 - PCG island generation solution. Stylized automated island generation including terrain, vegetation, roads, and water bodies

Star Epoch - Tencent Game

- Description:
 - Sci-fi style SLG mobile game
- Responsibilities:
 - PCG solution design and development for SLG. Feature design, map level design, and vegetation distribution planning

Project YRH - Tencent Game

- Description:
 - SLG mobile game
- Responsibilities:
 - Rendering optimization. Character material production optimization

Project LX - Tencent Game

- Description:
 - Anime-style side-scrolling mobile game
- Responsibilities:
 - Rendering optimization. Character material feature development, competitive product effect reverse engineering

Tarisland - Tencent Game

- Description:
 - Cartoon-style MMORPG multi-platform game
- Responsibilities:
 - Tool development optimization. HLOD workflow optimization

Annihilation Tide - Tencent Game

- Description:
 - AAA action console game
- Responsibilities:
 - Tool development. Volumetric cloud merging tool based on UE5-Houdini integrated plugin

My Time at Sandrock - Pathea Game

- Description
 - A cartoon-style simulation management game, sequel to My Time at Portia
- Responsibilities:
 - Tool development. Developed efficiency tools for artists, resource inspection and modification tools
 - Visual optimization. Bidirectional mapping, Billboard Cloud with lighting and shadow adjustments and production pipeline
 - Art pipeline optimization. Designed optimization solutions and developed tools based on existing workflows, documentation
 - Terrain pipeline. World terrain workflow setup, production, and modification using Houdini and World Machine

Seashore of Nightless - Pathea Game

- Description:
 - Unreleased cartoon-style RPG adventure mobile game
- Responsibilities:
 - PCG related. Open world map creation and various procedural art tools using Houdini
 - Shader related. Character rendering optimization, updated artist character model asset workflow to meet visual requirements
 - Art resource optimization. Asset adjustments based on performance requirements and batch processing tool development

Education

Jilin Animation Institute

2013.9 - 2017.7

- Animation Bachelor's Degree
